**CAD INCIDENT DISPOSITION CODE: [ 19 ] [ 004 ] [ ] [ ]**

On June 1st, 2012, I (Deputy Lucas Jones) responded to end of River Park Road in Fairhope regarding an attempted suicide. Dispatchers advised of a male subject that was found with a self inflicted gun shot wound to the head. The male subject was said to be in his vehicle and still breathing. The vehicle was a black 2000 Chevy C1500 Suburban (AL tag # 5A83V79). Cpl. Troy Bookout and Deputy Stephen Jerkins responded with me to assist. Upon our arrival in the area, a female subject flagged us down and pointed us in the direction of the Suburban. Another female subject was seen standing in the driver's doorway of the Suburban. The driver's door to the Suburban was open and a male subject was observed laying back in the driver's seat. Another vehicle was parked directly beside the Suburban. The other vehicle was a red Chevy Aveo (AL tag # 5A87N26). The other vehicle was facing the same direction almost window to window. The other vehicle was only a couple feet away from the Suburban. The female standing by the Suburban was ordered away until the scene could be declared safe. The male subject had an obvious gun shot wound on the right side of his head behind his ear. The male subject was still moving as we were trying to locate a gun. A small hand gun was located on the floor by the subject's feet between the seat and the center console. The gun was removed from the vehicle by Deputy Jerkins and secured in his vehicle. An ambulance responded and was on scene moments after it was determined safe. The other vehicle had to be moved forward several feet so the ambulance crew could remove the subject from the vehicle. Deputy Jerkins moved the other vehicle. The male subject was identified as Donald Paul Holland. The two females were identified as Wendy Wood Holland and Jennifer Gonzales Moore. The ambulance crew consisted of JD Bailey, Chris Howell, Daniel Freeman, and EMS Supervisor Glen Erwin (Med Star). I took photographs of Donald before he was moved and while he was being removed from the vehicle. I also took photographs of the vehicle and scene. The photographs will be turned in with this report as soon as possible. Donald was moved from the scene and air lifted (Life Flight) to Baptist Hospital in Pensacola Florida. Investigator Eric Winberg with the Criminal Investigations Division responded to the scene along with other Investigators. The scene was turned over to the Investigators upon their arrival. The mentioned hand gun was turned over to Investigator Winberg along with all other evidence. Donald's condition was unknown by this Deputy at the time of this report. Prior to this incident, several Deputies were already in the area looking for Donald regarding a "BOLO" that was sent out by the Criminal Investigations Division. The BOLO noted that Donald was wanted for questioning [REDACTED]. The "BOLO" also mentioned Donald making suicidal threats. The mentioned "BOLO" is attached below this narrative. This report will be forwarded to the Criminal Investigations Division for further investigation.

**Case Number: 12-1901**  
**Case Type: Death Investigation**  
**Subject: Donald Holland**

He

further stated that he was going to kill himself. With that information in hand, several deputies were dispatched to the Fish River area in an attempt to locate the suicidal suspect (Please see Cpl. Hill's supplemental report & the attached BOLO's for further details).

At approximately 1410 hours, while monitoring BCSO radio traffic, I heard that Donald Holland had been located at the dead end of County Road 33, South of County Road 32 with an apparent self-inflicted gunshot wound to the head. I immediately departed the Robertsdale area and responded to the scene. Upon arrival, I observed that several deputies along with the local volunteer fire department was on scene. I also observed two Med Star Units on scene as well. As I exited my vehicle, I saw that paramedics were already rendering aid to Donald Holland while he was laying on the backboard. I observed what appeared to be an intracranial gunshot wound to the subject's right temporal lobe. Moreover, he appeared to be breathing on his own, however his breathing was labored and shallow. Next, I took several photographs of Donald Holland while paramedics were administering emergency medical care to him. Moments later, he was transported to Baptist Hospital in Florida via Life Flight.

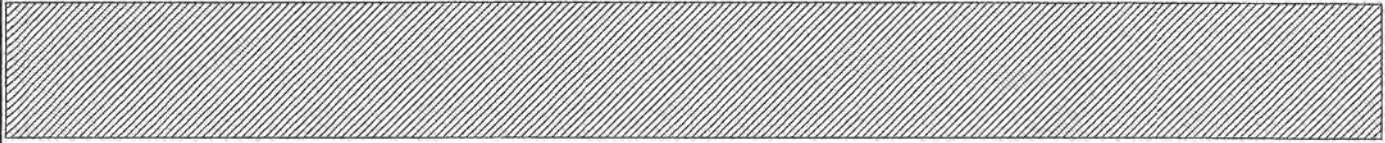

Next, I examined and collected the pistol from Deputy S. Jenkins. The pistol is described as a Raven .25 caliber Automatic, Chrome with wood grips, [REDACTED]. I observed blood spatter on the muzzle/slide and a blood smear on the grip, next to the serial number. Investigator W. Schmierer and Cpl. B. Rowell processed the scene for physical evidence. Afterwards, I had the vehicle towed from the incident location to the Robertsdale Sheriff's. I stayed with the vehicle during transit in order to maintain the chain of custody. Later that day, Cpl. Rowell and I cataloged and submitted the above listed collected items to the Evidence Locker at the Robertsdale Sheriff's Office.

Over the following weekend, I maintained close contact Holland family and hospital staff in order to monitor Donald Holland's condition. I was advised by hospital staff that they would turn off life support on Monday, June 4th, 2012 once a surgical team arrived from Gainesville, Florida. They informed me that Mr. Holland was an organ donor and they were going to harvest his organs as soon as he passed away. On June 4th, 2012 at approximately 1530 hours, I was notified by hospital officials that Mr. Holland was declared dead. They informed me that an autopsy would be performed on June 6th, 2012 by the District 1 Medical Examiners Office located at Sacred Heart Hospital. On June 6th, 2012, I was contacted via telephone by Emily Max with District 1 Medical Examiners Office. Mrs. Max stated that they had recovered one projectile from the decedents' head and it was available for recovery. I thanked her for her assistance and terminated the telephone call.

On July 13th, 2012, I received the Autopsy Report fro the District I Medical Examiner's Office (MLA12-348). The Report was generated by Dr. Andrea Minyard, Forensic Pathologist & Chief Medical Examiner. According to the report, the cause of death was gunshot wound to the head. The manner of death was suicide. On August 7th, 2012, Sgt. M. Gaull and I traveled to the District I Medical Examiner's Office located within Sacred Heart Hospital,

Pensacola, Florida, in order to retrieve the projectile and return it to the Baldwin County Sheriff's Office Evidence locker. The investigative case file will be forwarded to the Baldwin County District Attorney's Office for Grand Jury presentation. In conclusion, I request to have the case closed by exceptional clearance, other prosecution, Grand Jury presentation. No further investigative action is needed at this time.

The autopsy is performed by Dr. Andrea N. Minyard in the District One Medical Examiner's Office located in Sacred Heart Hospital in Pensacola, Florida at 9:30 a.m. on June 6, 2012, with Ms. Christina Tisa and Mr. Nicholas Linck in attendance.

**CLOTHING:**

The body is received unclad.

**IDENTIFICATION TAGS:**

The right ankle and right great toe have identification tags bearing the decedent's name.

**EXTERNAL EXAMINATION:**

The body is that of a well-developed, well-nourished, white male, appearing at least ten years older than the offered age of 44 years. The body has a predonation length of 72 inches and a predonation weight of 270 pounds. Rigor mortis is easily broken. Livor mortis is posterior, except over pressure points, and does not blanch.

The scalp hair is gray with male pattern balding and measures up to 2 inches in maximum length. The irides are hazel. The sclerae and conjunctivae are unremarkable. The nose and mouth are clear. The natural mandibular teeth are in adequate repair. The decedent wears a mustache and beard.

The neck is unremarkable. The trachea is in the midline. The chest is symmetrical. The abdomen is flat. The external genitalia are those of a normally-developed adult male. The fingernails are short to long and dirty.

**IDENTIFYING MARKS:**

---

The right arm has a tattoo of an eagle. The chest has a midline vertical linear 8 inch scar. The left arm has a tattoo of a deer. The left forearm has a tattoo of a cross. Each medial thigh has a vertical linear 3 inch scar. The left leg has a vertical linear 9 inch scar. The right leg has a vertical linear 8 inch scar. The mid lower back has a vertical linear 5 inch scar.

**MARKS OF MEDICAL INTERVENTION:**

The head has a bandage. The right shoulder has a tan medicinal patch. The right wrist has two identification bracelets bearing the decedent's name. Both sides of the upper back and the left lower back have EKG pads. The entrance wound to be described has sutures.

**EVIDENCE OF TISSUE DONATION:**

Both arms and both lower extremities have vertical linear incisions closed with string.

**INJURIES - EXTERNAL AND INTERNAL:**

**GUNSHOT WOUND OF HEAD:**

- A. Entrance: In the right temple, 3 inches from the top of the head and centered in line with the right external auditory meatus, is an entrance gunshot wound consisting of a ½ inch round defect with a circumferential 1/16 pink abrasion collar. The wound is surrounded by several irregular red abrasions and puncture holes consistent with medical therapy.
- B. Recovery: Recovered in the left parietal lobe of the brain are two distorted lead fragments and a distorted copper fragment.
- C. Path: The hemorrhagic wound track sequentially perforates the

right temporal bone, the right temporal lobe of the brain, and the left parietal lobe.

Associated abnormalities include patchy subarachnoid hemorrhage, subdural hematoma, fractures of both orbital plates, the right temporal bone, and the right frontal bone, contusions of the inferior aspects of both frontal lobes of the brain, and ecchymoses of both eyes.

D. Direction: The wound track travels from the decedent's right to left and upwards.

Having been described, the injuries will not be repeated.

**INTERNAL EXAMINATION:**

**BODY CAVITIES:**

The lungs are normally-inflated and collapse when the pleural cavities are opened. The pleural cavities have medial adhesions. The diaphragm has no abnormality. The mediastinum is in the midline. The pericardial sac is firmly adhered to the epicardial surface. The abdominal cavity has glistening serosa and has no free fluid. The organs are normally situated and congested. There are no unusual odors.

**CARDIOVASCULAR SYSTEM:**

The heart is 700 grams (expected range 330 - 575 grams). The epicardial surface has barely patent bypass grafts extending from the aorta to the left circumflex artery (x 2) and the aorta to the right coronary artery. The heart is of the normal configuration. The chambers and valves have the usual size-position relationship. The mural and valvular endocardia have no vegetations or thrombi. The papillary muscles and projecting myocardial muscle bundles are

---

of normal prominence. The chordae tendineae have no abnormalities. The coronary ostia are in their usual location and give rise to normally-distributed arteries. The coronary circulation is left-dominant. The coronary arteries distal to the graft insertion sites have varying degrees (between 50% and 75%) of atherosclerotic stenoses. The cut surfaces of the red-brown myocardium are free of abnormal markings.

The pulmonary trunk and arteries have no thromboemboli. The intimal surface of the aorta has mild atherosclerosis. The ostia of the major branches are of a normal distribution and dimension. The inferior vena cava and its major tributaries are thin-walled and patent and have no antemortem clots.

**RESPIRATORY SYSTEM:**

The lungs are of the usual lobation and weigh 1100 grams and 900 grams, right and left respectively. The pleural surfaces are thin and free of exudates. The tracheobronchial tree is patent and the bronchi are lined by smooth tan epithelium with a small amount of tan foamy fluid. The cut surfaces of the lungs are red and edematous. Pulmonary arteries and veins are normally developed and patent.

**LIVER, GALLBLADDER, AND PANCREAS:**

The liver is 2440 grams. The capsule is intact. The cut surfaces are homogeneously red-brown and of normal consistency. There are no focal lesions. The thin-walled gallbladder contains approximately 30 ml of dark green bile. There are no stones. The pancreas has the usual tan lobulated appearance, without calcification or hemorrhage.

**HEMATOPOIETIC SYSTEM:**

OFFICE OF THE MEDICAL EXAMINER  
DISTRICT I, FLORIDA  
AUTOPSY PROTOCOL  
MLA12-348

HOLLAND, DONALD P.

44/W/M

DOB: 02/12/68

INVESTIGATING AGENCY: BALDWIN COUNTY SHERIFF'S OFFICE  
INVESTIGATING OFFICER: WINBURG  
COMPLAINT NUMBER: 12-1901

---

The spleen is 260 grams. The capsule is smooth, shiny, and intact. The cut surfaces are dark purple. Lymph nodes are not enlarged. The thymus is not seen. The bone marrow is red-brown and homogeneous without focal abnormality.

**GENITOURINARY SYSTEM:**

The kidneys are of similar size and shape and together weigh 420 grams. The intact capsules are smooth and thin. The cortical surfaces are smooth and red-brown. The cut surfaces have well-demarcated cortices and medullae. The calyces, pelves, and ureters are unremarkable. The urinary bladder is empty. The mucosa is gray-tan and intact.

The prostate and testicles are unremarkable.

**ENDOCRINE SYSTEM:**

The thyroid and adrenal glands are unremarkable.

**GASTROINTESTINAL SYSTEM:**

The esophagus is lined by intact, tan-white, smooth mucosa. The gastric mucosa is arranged in the usual rugal folds, and the lumen contains 10 ml of dark brown fluid. The small and large intestines are unremarkable. The mesentery and omentum appear normal. The appendix is present. The colon contains formed stool.

**MUSCULOSKELETAL SYSTEM:**

The ribs, sternum, clavicles, pelvis, and vertebral column have no recent fractures. The supporting musculature and soft tissues are not unusual.

**NECK:**

OFFICE OF THE MEDICAL EXAMINER  
DISTRICT I, FLORIDA  
AUTOPSY PROTOCOL  
MLA12-348

HOLLAND, DONALD P.

44/W/M

DOB: 02/12/68

DOD: 06/04/12

INVESTIGATING AGENCY: BALDWIN COUNTY SHERIFF'S OFFICE  
INVESTIGATING OFFICER: WINBURG  
COMPLAINT NUMBER: 12-1901

---

Examination of the soft tissues of the neck, including strap muscles and large vessels, reveals no abnormalities. The hyoid bone and thyroid cartilages are intact. The larynx and trachea are patent and contain no foreign matter. There are no tongue contusions.

**NERVOUS SYSTEM:**

The brain is of a normal convolitional pattern and weighs 1440 grams. The cerebral hemispheres are symmetrical, with a normal pattern and distribution of sulci and gyri. Aside from described injuries, the cut surfaces of the brain reveal no other lesions within the cortex, subcortical white matter, or deep parenchyma of either hemisphere. Sections through the brain stem and cerebellum are unremarkable.
